Understand, edit, format, ship

LEADER = SPACE

LSP intelligence and Primeagen-style tools for daily development.

LSP navigation + actions

<code>gd / gD</code>	Definition / declaration
<code>gr</code>	References in Telescope
<code>gI</code>	Implementations in Telescope
<code>gy</code>	Type definitions in Telescope
<code>K</code>	Hover documentation
<code>Ctrl-s (insert)</code>	Function signature help
<code>Space cr</code>	Rename symbol
<code>Space ca</code>	Available code actions
<code>Space cd</code>	Diagnostics for current line
<code>Space ws</code>	Search workspace symbols
<code>Space th</code>	Toggle LSP inlay hints
<code>:LspInfo</code>	Inspect attached language servers

Completion + snippets

<code>Ctrl-n / Ctrl-p</code>	Next / previous completion
<code>Ctrl-Space</code>	Open completion menu
<code>Ctrl-y</code>	Accept selected completion
<code>Enter</code>	Accept only an explicit selection
<code>Tab / Shift-Tab</code>	Completion or snippet jump
<code>Ctrl-b / Ctrl-f</code>	Scroll documentation
<code>Ctrl-e</code>	Close completion menu

Formatting

<code>Space cf</code>	Format buffer or visual selection
<code>Space uf</code>	Toggle format-on-save globally
<code>:FormatToggle!</code>	Toggle for current buffer only
<code>:ConformInfo</code>	Inspect formatter availability

Diagnostics

<code>[d /]d</code>	Previous / next diagnostic
<code>Space xx</code>	Workspace diagnostics
<code>Space xX</code>	Current-buffer diagnostics
<code>Space xq</code>	Quickfix list in Trouble
<code>Space cs</code>	Document symbols in Trouble
<code>Alt-j / Alt-k</code>	Next / previous quickfix item

Git workflow

<code>Space gs</code>	Open Fugitive status
<code>]h / [h</code>	Next / previous changed hunk
<code>Space gp</code>	Preview changed hunk
<code>Space gr</code>	Reset changed hunk
<code>Space gb</code>	Toggle line blame
<code>g? (Fugitive)</code>	Show status-buffer operations
<code>:Git commit</code>	Commit in a Neovim buffer
<code>:Git blame</code>	Open interactive blame view
<code>:Gdiffsplit</code>	Compare worktree with index

Editing + registers

<code>J / K (visual)</code>	Move selected lines down / up
<code>J (normal)</code>	Join lines without cursor drift
<code>Space p (visual)</code>	Paste without replacing register
<code>Space y / Y</code>	Yank to system clipboard
<code>Space d</code>	Delete without replacing register
<code>u / Ctrl-r</code>	Undo / redo
<code>.</code>	Repeat last change
<code>ciw / diw</code>	Change / delete inner word
<code>Space s</code>	Replace word throughout buffer

Utility tools

<code>Space uu</code>	Toggle Undotree
<code>Space tz</code>	Toggle distraction-free Zen mode
<code>:Lazy / :Mason</code>	Manage plugins / developer tools
<code>:checkhealth</code>	Run Neovim diagnostics
